SUMMARY

Software Engineer at Infosys specializing in Full-Stack development. Demonstrated success in improving operational efficiency and mentoring team to deliver customized solutions aligned with client goals. Proficient in cross-functional collaboration, driving project success and ensuring stakeholder satisfaction.

SKILLS

- **Frontend frameworks:** Angular, ReactJS
- **Backend technologies:** NodeJS, ExpressJS
- Microservices architecture, REST APIs,
- Authentication & Authorization
- **Database management:** MongoDB, PostgreSQL
- **Cloud platforms:** Azure, AWS
- **Testing tools:** JEST, SonarQube
- **Monitoring solutions:** SumoLogic, Winston
- **Version control systems:** Git, Bitbucket
- **Programming languages:** TypeScript, JavaScript
- Agile Framework
- Scalable Web Applications

EXPERIENCE

INFOSYS

Associate Consultant

12/2024 to Current

- **Supplier Collaboration:** Developed a supplier collaboration portal using NodeJS, Express, PostgreSQL, and AWS Cloud for Automobile Client, which improved supplier cooperation for vehicle parts, enabling faster demand forecasting and faster data retrieval. Contains user-friendly screens displaying data tables. Incorporated efficient global and inline search functionalities for quick data access. Allowed bulk addition and editing of entries via file uploads to optimize workflow. Provided CSV download options for efficient data management.
- Collaborated with clients to identify needs and develop tailored solutions.
- Mentored junior engineers on best practices and coding standards.
- Conducted code reviews to ensure adherence to project specifications.
- Collaborated with cross-functional teams to ensure project alignment with client objectives.

TATA CONSULTANCY SERVICES

System Engineer

08/2021 to 11/2024

- **Flight Summary Service:** Engineered microservices with Node.js, IBM MQ, and SQL DB for automated data integration in aviation sector. Enhanced accuracy of crew qualifications through timely updates based on flight activity data. Collaborated with architects to troubleshoot messaging issues related to missing necessary data. Established email alerts to inform operational team of message failures, ensuring immediate action.
- **Transformation Portal:** Delivered a full stack Data Migration solution using Angular and Node.js, enabling efficient legacy to new system migration. Enabled seamless data migration between legacy and new systems with JSON, XML, and XLSX format support. Facilitated file handling for ZIP archives and implemented stakeholder update notifications.
- **Cutover Services:** Drove development of cutover service utilizing Node.js and Azure Blob Storage for data validation. Generated automated comparison reports, promptly notifying teams of any inconsistencies.

EDUCATION

BACHELOR OF TECHNOLOGY: RTU

09/2021

Swami Keshvanand Institute of Technology, Jaipur, India

XII CLASS: COMPUTER SCIENCE

03/2017

Kendriya Vidhyalaya, Ajmer, India
